**DETAILED ACTION**

(1)

***Allowable Subject Matter***

Claims 3, 16 and 19-55 have been found to be allowable over the prior art of record.

(2)

The following is an examiner's statement of reasons for allowance:

Methods for the formation of articles having an active substance, i.e., laminates having an incorporated insecticide, such as taught by GB 213740 to Senninger and U.S. Patent No. 4,693,393 to Von Kohorn et al., are known in the art. Senninger, for example, discloses one such method for producing an article having an active substance comprising the steps of: Providing a first and second base material layers; providing an active substance as a flowable medium and applying the active substance onto either one or both of the base material layers; and placing the first and second base material in contact with the coated active material disposed there between and bonding the layers together. Although Senninger discloses that the active substance may be applied by spraying, printing or any suitable method, neither he nor any of the prior art of record specifically teach or suggest the pressure parameters set forth in applicant claims 3 and 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

(3)

***Response to Amendments and Arguments***

The amendments and arguments filed May 3, 2004 are acknowledged. In response to the recasting of claim 3 (which was previously indicated as encompassing allowable subject matter) in independent form and the cancellation of claims 1-2, 4-15, 17 and 18, claims 3, 16 and newly added claims 19-55 (which likewise incorporate the same allowable subject matter in independent claim 19) are passed to issue as set forth and explained in sections (1) and (2), above.
